

How do I receive death benefits if the cause and manner of death is pending?

The “pending” death certificate is legal proof of death. Some insurance companies and financial institutions may accept pending death certificates for the purpose of paying benefits or handling other accounts. The Family Advocate is available to assist you with this matter.

How do I obtain a copy of the Medical Examiner Report?

Copies of the report(s) are available upon completion of the case. Completion will vary depending on the complexity, circumstances, and need for additional testing or investigation required for each individual case. Often, cause and manner of death are determined the day of the examination. In other cases, however, further testing or investigation may be required in order to accurately determine cause and manner of death.

You may contact Administrative Support Services at (602) 506-3322 to request a copy of the report. There is no fee to obtain a copy of the report if you are legal next of kin. If you wish to obtain more than one copy, or if you are not next of kin there is a fee of \$5.00 for each additional copy. A request form must be completed and submitted.

You may also refer to our website to obtain a request form <https://www.maricopa.gov/468/Medical-Examiner>

For updates on cause and manner of death and availability of the report, you can also visit the Case Status feature on our website.

What is the role of the Family Advocate?

When someone suffers a loss, it is not uncommon to feel overwhelmed or like your life is out of control. The Family Advocate is available to speak with families, answer questions, and provide emotional support and resources. Services and resources include:

- *Current case status updates*
- *Liaison assistance with OME and outside agencies*
- *Counseling Services Resource*
- *Support Groups Referrals*
- *Youth Services Resource*
- *Community Information and Referral Services*

HELPFUL INFORMATION FROM THE MARICOPA COUNTY OFFICE OF THE MEDICAL EXAMINER (OME)

The death of a loved one can cause tremendous stress and sorrow. Everyone experiences a variety of physical and emotional responses.

This brochure is to help provide answers and to guide you when a loved one dies.

We hope it will assist you during the grieving process and answer some of the most frequently asked questions about the role of the Medical Examiner.

For additional information, please visit our website at <https://www.maricopa.gov/468/Medical-Examiner>

Why is the Office of the Medical Examiner Involved?

Arizona Revised Statute (A.R.S.) §11-593 requires that the following deaths be reported to the Office of the Medical Examiner:

- Death of person not under the current care of a health care provider as defined pursuant to section 36-3013.
- Death resulting from violence.
- Unexpected or unexplained death.
- Death of a person in a custodial agency as defined in section 13.4401.
- Unexpected or unexplained death of an infant or child.
- Death occurring in a suspicious, unusual or non-natural manner, including death from an accident believed to be related to the deceased person's occupation or employment.
- Death occurring as a result of anesthetic or surgical procedures.
- Death suspected to be caused by a previously unreported or undiagnosed disease that constitutes a threat to public safety.
- Death involving unidentifiable bodies.

It is up to the Medical Examiner to determine if a case meets jurisdictional requirements to further investigate and certify the cause and manner of death on the death certificate.

Why is the death being investigated?

Medicolegal death investigations are conducted for the best interest of the public at large and only under the circumstances listed above. Not all investigations require examination of the body or a forensic autopsy.

If it is determined that the body requires examination, the body will be transported to 701 W. Jefferson St. Phoenix, AZ 85007.

How is identification confirmed?

Your family member is identified through visual comparison to a legal form of identification, photograph identification by family, or forensic methods including fingerprints, DNA, dental charts, or other unique identifying marks. In situations where an immediate family member questions the identification or wishes to assist in the identification process, a written or electronic request can be submitted to request an identification meeting pursuant to A.R.S. §11-597.01

Note: The Office of the Medical Examiner is a forensic medical setting and only a photograph for identification can be provided. Physical viewings are not allowed at this location.

How is an examination performed?

Each case is investigated on a case by case basis. If an examination is needed it will be completed by a medical doctor who specializes in Forensic Pathology. The examination may include an autopsy. An autopsy may be necessary to assist in determining cause and manner of death. The procedure is an internal examination of the body to help determine facts about the death and may be required due to the circumstances surrounding the death.

Please make the Investigator aware of any specific requests you have regarding the examination. The Medical Examiner will take the family wishes into consideration; however, the Office of the Medical Examiner is not always able to accommodate these requests.

In order to meet our mission and statutory duties, an internal examination may be required. Additionally an autopsy may not always be completed if requested.

How do I receive my family member's personal effects?

Any personal effects obtained by the OME will be released with the body to the selected funeral home/mortuary unless those items are deemed evidence, in which case they will be released to the appropriate law enforcement agency.

What is the process for the release of my family member?

Release will occur after the completion of the examination by the Medical Examiner. To initiate the release process the next of kin will need to contact a service provider (e.g. funeral home, mortuary, cremation society, transportation provider)

The mortuary, funeral home or other service provider will follow up on behalf of the family to coordinate the release.

Your service provider will also request certain vital statistic information that must be recorded on the death certificate.

How do I obtain a copy of the death certificate?

You may obtain a death certificate through your designated funeral home/mortuary or from the Maricopa County Department of Public Health, Office of Vital Records. The OME is responsible for completing the medical portion of the death certificate within 72 hours after the examination (excluding weekends and holidays), in compliance with A.R.S. §36-325. In some cases, a specific cause and/or manner of death is unable to be determined after examination without further laboratory testing or investigation. In those instances the cause and manner of death is listed as "Pending". Once the investigation is concluded, an amendment to the death certificate is filed with the Office of Vital Records. The funeral home/mortuary is responsible for completing the demographic portion of the death certificate.

A death certificate can be requested in-person or online. Please visit the website for additional information <http://maricopavitalrecords.com/>
