

# CURRENT & UPCOMING PROJECTS

## CAPITAL IMPROVEMENT PROGRAM PROJECTS

### Chandler Heights Basin

The first two of five project construction phases are complete; remaining construction phases will primarily be executed through the dirt brokering process whereby dirt will be removed by others at no cost to the District. This will be dependent on demand for excavated materials and the timing of area infrastructure construction. The Town of Gilbert has obtained an easement over the basin project that will allow the town to implement a regional park project at the basin site, the design of which is underway.
