Planning & Development Department PRELIMINARY PLAT PROCESS

SUBDIVISIONS

A subdivision is defined by ARS §32-2101. Any subdivision within the unincorporated area of Maricopa County must be approved by the Board of Supervisors prior to being recorded. Approval of subdivisions occurs in two (2) stages: Preliminary Plat and Final Plat.

APPLICATION

An application for a Preliminary Plat must be filed with the Planning and Development Department (details are attached). A pre application meeting is required.

TECHNICAL ADVISORY COMMITTEE REVIEW

The Technical Advisory Committee (TAC) is composed of representatives of the County's Planning, Transportation, Drainage Review, Storm Water Quality, Parks and Recreation, Library, Flood Control, and Environmental Services Departments. Other comments may be supplied by representatives from other County departments, fire district, school district, City or Town, homeowner's association, or other interested parties.

After a complete application is submitted and accepted by the Planning Department, staff will forward copies of the application to members of the TAC. Staff will then schedule the request for review by the TAC (see attached schedule), and notify the owner or authorized agent of the actual date and time of the TAC meeting. Staff will provide the owner or authorized agent with written comments from any reviewing agency unable to attend the meeting.

POST-TAC REVIEW

Depending on the comments received at the TAC, the application materials may need revisions. The owner or authorized agent must submit revised materials, reflecting the TAC comments, to the Planning and Development Department, which will forward the revised materials to the appropriate agencies. Once they are satisfied that the technical requirements have been met (more than one re-submittal may be necessary), the request will be scheduled for public hearing by the Planning and Zoning Commission. Please note that compliance with comments from TAC and/or staff does not guarantee that the application will be supported by staff or approved by the Commission.

PLANNING AND ZONING COMMISSION

The Commission will hold a public meeting for all interested persons wishing to comment on the proposed Preliminary Plat. The owner or authorized agent must attend this meeting, and will be asked to comment on the application, the staff report, and/or any comments that are made during the public meeting. The Commission will either approve or deny the request. Their action may or may not concur with staff's recommendation and may include additional requirements. If a Preliminary Plat is denied, it will be automatically forwarded to a Board of Supervisor's meeting for final determination.

Preliminary Plat approval is valid for a period of twenty four (24) months from the date of Commission action. A Preliminary Plat may be administratively extended for twelve (12) months, if in the opinion of the Director, satisfactory progress has been made towards completion of the Final Plat. If any changes other than a time extension to the original approval of the Preliminary Plat by the Commission are proposed, an application for a new Preliminary Plat will be required.

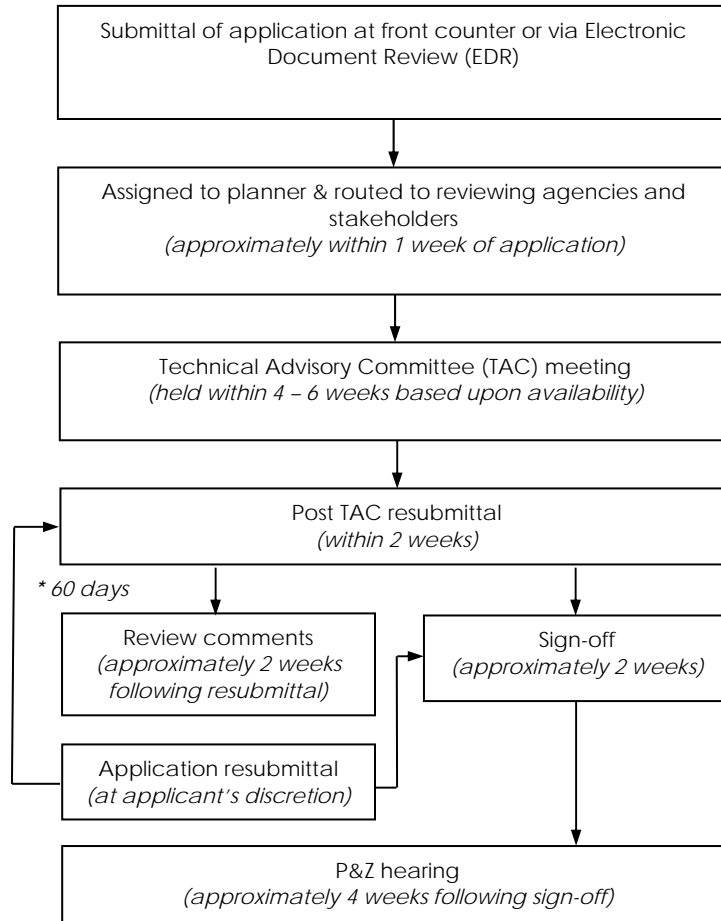

APPEALS

The conditions of approval of this Preliminary Plat may be appealed to the Hearing Officer pursuant to ARS § 11-832. Provide request for appeal to the Hearing Officer Liaison at this address within 30 calendar days of the administrative/ministerial approval date to schedule an administrative hearing.

DRAINAGE REVIEW REQUIREMENTS FOR PRELIMINARY PLAT

A drainage plan and report needs to accompany a preliminary plat submittal. The drainage plan/report shall be developed in accordance with Chapter 6 of the Maricopa County Drainage Policies and Standards Manual, be signed and sealed by an Arizona Registered Professional Civil Engineer, and address the following at a minimum:

- 1. Offsite Hydrology** – Need to determine the quantity, the entrance and exit points, and how the flow is to be routed through or around the site.
- 2. Onsite Hydrology** – Need to show how the flows are to be routed to retention basins.
- 3. Onsite Retention** – Need to retain water for the 100-year, 2-hour storm for the site, including adjacent right of way plus one (1) foot of freeboard. Determine volume needed and the size and location of basins. Provide a note that basins must drain within 36 hours.
- 4. Cross Sections** – Provide typical sections for edge conditions indicating tie-in to existing surrounding grades and interior design features such as retaining walls and drainage channels.
- 5. Finished Pad Elevations and Certification** – Provide finished pad elevations in areas of the project site with unique drainage features (adjacent to basins, channels and/or in areas of significant grading) to demonstrate that the pads will be safe from inundation during the 100-year peak runoff event.
- 6. Topography** – Need to show natural and proposed contour elevations and/or spot elevations. All contour lines must be annotated,
- 7. Preliminary Construction Details** – Sufficient detail shall be provided to verify that any proposed drainage control structures can be constructed within identified easements or tracts.
- 8. Floodplains** – Need to show the regulatory floodplain boundaries if the site is within a Federal Emergency Management Agency's (FEMA) special flood hazard area. Delineate all floodplains (non-FEMA) of 50 cfs or greater. All Floodplain delineations must be shown on the preliminary plat.
- 9. Erosion Setbacks** – For washes and other watercourse channels flowing at 50 cfs or greater an erosion setback will need to be determined, which meets Arizona State Standard 5-96.
- 10. Drainage Easements** – All drainage control structures, including retention, shall be in platted tracts or easements.

Since complex drainage systems may require more detailed information, a meeting should be arranged with personnel from Drainage Review.

FEE INFORMATION*:

FEE: \$ 2,000 + \$200/acre maximum \$34,000

* See the Drainage Regulation for current fee schedule
